

Like to make stuff? We can really help with that, come & stock your bins at stuff day!

# Come to the Easiest Stuff Day Ever! On-line Stuff Season, 24/7 Opens April 5<sup>th</sup>, 2021 at Sphere Research Corporation 3394 Sunnyside Rd., West Kelowna

Component Dragon courtesy of Honeywell Computers

**Yes, we can shop for you and ship if you can't get here. Even Free stuff.**

☺ Every year, **Sphere Research** holds at least one annual **Stuff Day**, where we give away all kinds of great electronic, optical and mechanical parts and equipment free, and provide other material for a small charge to help clear out our excess stock and clear some space.

## LOTS of Scopes & DMMs!

Everybody's favorite design tools!

☺ There's lots of material from electronic parts like LEDs, semiconductors, capacitors, pots and displays to scrap test equipment, working test gear, meters, DMMs, fans, boxes and enclosures, ICs, **microscopes**, high end tools and **even some TUBE TESTERS, Amateur gear and lots of hard to find CRTs and PMTs!** Also **FREE** databooks!

☺ Plus, every student and experimenter's favorite, **solderless breadboards, and labs in a box**, the ideal way to test new circuits. Also, great DMMs, scopes, test leads and more. **Yes, we take Visa & MasterCard.**

### YES, WE TAKE REQUESTS!

Don't see what you want, tell us what that is, and we will try and put it on line.

**Want more info? Go visit the Stuff Day Webpage at :**

**<http://www.sphere.bc.ca/test/stuffday.html> for all the details,**

**including how the new **REMOTE STUFF SEASON** works.**

**YES**, there is totally free stuff, and yes, there is also stuff for sale, it's totally up to you and your interests. If you want to pick-up, we are on the West Side at **3394 Sunnyside Road** (just around the corner from Quails' Gate Vineyard, take Boucherie from Hwy. 97), our Telephone is **(250) 769-1834**. Can't get here, use **remote stuff day and ship!** **There are some big items that are pick up only, just too difficult or expensive to ship.**

**Here's just some of the items this year:** VFD and LCD displays, **power supplies**, prototype boards, scrap gear for cabinets and parts, tools, cheap overhauled DMMs, Panel Meters, audio goodies, computer parts and cables, **Stereo Optical Microscopes**, hardware, ICs, Tektronix, HP and Philips/Fluke oscilloscopes, RF test gear and parts, solderless breadboards, surface mount & through hole resistors and capacitors, calibrators, large electrolytics, power resistors, scope probes, LEDs of all kinds and portable labs. **Plus REQUESTS!**

Need **FREE** School Stuff?!
